Ideas and initiatives emerged in all shapes and sizes.

Mobilize the energy,
vision and commitment of
the residents – give them
a voice.

Opportunity is too ripe to
pass over.

Shift from a disparate
state to a unified front.

Capitalize on resources
inside and outside our
community – scholarly,
professional, financial,
time.

No time like the present.

How do we harness the resiliency and energy to rebuild, revitalize and even reimagine some pieces in a manner that preserves the charm of the community while reinforcing our infrastructure and ensuring its economic viability for the long term?
